

# Dragonfly Puppet

(Remember always ask permission and clean up after you are done)

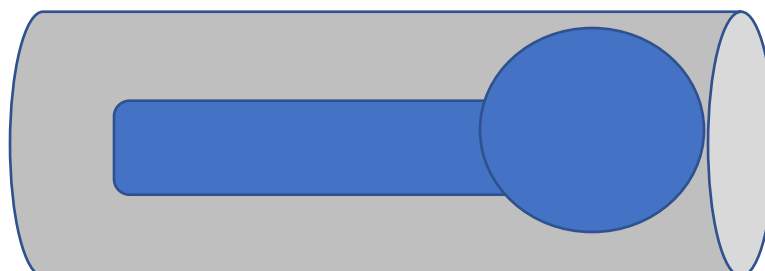

## Materials Needed:

- 1 long tube
- 1 toilet paper tube
- Paint or colored paper
- Bubble wrap (the small bubble kind)
- 2 eyes
- Glue
- Scissors

## Directions:

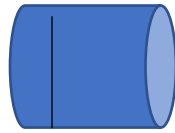

Cut the tube lengthways and flatten slightly. Draw on a large circle and a thick long tail. Something similar to this example.

Cut out this shape from the tube. Cut a ring from the short tube.

Paint or cover your dragonfly with the color of your choice. Stripes on the tail look nice. Paint or cover the ring as well.

Glue the ring in place behind the dragon's head.

Cut out two sets of wings from bubble wrap and 2-4 round circles for eyes. You will need 4 if you do not have googly eyes. 2 circles should be slightly larger.

Glue the eyes together. Glue the wings together by crossing the two pieces to make an "X". Glue them in place on the dragonfly. See photo above.

Put your fingers through the ring in the back and fly your dragonfly.
