

Goldfish

(Remember always ask permission and clean up after you are done)

Materials Needed:

3 paper plates colored

Paint (2-3 colors) if not using colored plates

Decorations

2 eyes

Glue

Scissors

Directions:

Cut a triangle shaped slit in two of the plates for the mouth of the fish. Start small and see how it looks. If you need a bigger triangle you can cut a little bit more until it looks like you want it. Fold back a small amount of the edge of the slit to make the fish lips.

From the third plate cut out a 1 triangle tail (1/4 of a plate) if you are painting and 2 triangle tails if using colored plates. Cut two fins.

Paint all the pieces if painting. Glue the tail pieces together, white sides together.

Glue the two plates together putting the tail between the two plates. They may need to be flattened a little bit. Add eyes and decorate with scales and the fins.
