

Marble Run

(Remember always ask permission and clean up after you are done)

Materials Needed:

You decide how and what you need to make your marble move using the force of gravity. Here is a collection of pictures. There is no right way or wrong way. Look around. What can you find to help you build your own marble run?

Paper towel and toilet paper tubes with **painters tape**

Straws and a box

This box has two marble runs so you can race someone.

Pool noodles wrapping around a ladder

Super Big

This one starts in a milk jug and lands in a cup. I bet that saves time.

Boxes and other materials create these upright marble runs. I wonder if tipping the box back will change anything?

I hope you will post pictures in your Beanstack account. I am looking forward to see the creative marble runs.
