

Maze

(Remember always ask permission and clean up after you are done)

Materials Needed:

1 box with lower sides

Graph Paper

Pipe Cleaners/Straws

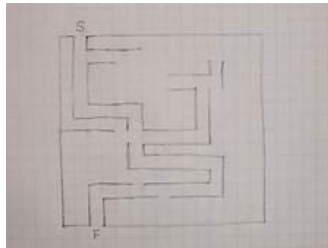

Tape

Marble

Directions:

First step is finding the box you will use and then plan your maze accordingly. Use some paper and draw what you want to create.

There is not right way to build your maze. You want your marble to be able to roll from the start to the finish. Make some paths that will make you get stuck.

Maybe you can even make a life-sized backyard maze for your family.
